## **UPVC Cartridge Filter Housing (8/9 elements)**

UPVC cartridge filter housing is a filter system with high precision. It consists of the housing and cartridge elements, mainly used in pretreatment. It can be widely used in electronic industry, sewage treatment, beverage, foods, pure water treatment, also it can acts as home water purification equipment.

The housings are designed to accept different types of cartridges which can be used for the removal of turbidity, precipitated iron, rust, scale, cysts and other micro-level particulates. The patented design filter housing made of durable, corrosion and UV resistant UPVC is suitable for the low pressure applications up to 0.6MPa.

It is manufactured under ISO9001 quality management system, have excellent chemical resistance, will be a popular choice among water filtration professionals for there versatility, size, economy, high flow, simplicity, water saving and wide range of applications.

### Features and Advantages:

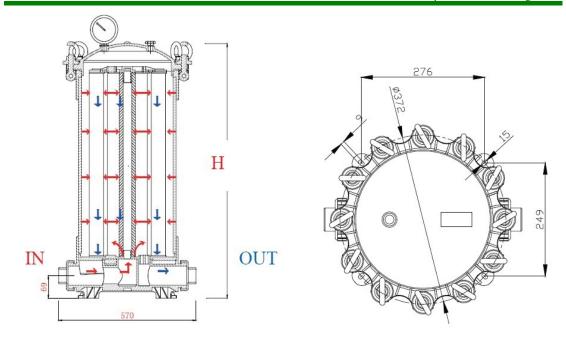

Price Competitive
Easy to Install and Maintain
Highly Versatile
Heavy Duty, Non-corrosive UPVC
Higher Flow Rates and Capacity
Accepts a Wide Range of DOE(double open end) Cartridges
Air Vent and Pressure Gauge in Cap (Pressure Gauge is an option)
0-0.6MPa 100000 Times Recycle Fatigue Test Approval
